

FOR IMMEDIATE RELEASE

Volkmann to introduce new powder handling equipment at Pack EXPO Las Vegas

(Bristol, PA) Volkmann, Inc., manufacturer of high quality, high performance vacuum conveying systems for the transport of fine food powders, chemicals, granules, pellets, tablets and other small components in lean, dense or plug flow conditions will be exhibiting several new products at Pack EXPO Las Vegas at Booth #C-5506. The most notable product is a new version of Volkmann's unique No Tip Unloader that allows the

unloading of drums and bins without the need to lift and tip the bin while also maintaining containment. Also at the exhibit will be the latest Bag dump rip and tip station and a new range of post hoists for either fixed or mobile use. New applications for 3D printing as well as the traditional use of Volkmann's vacuum conveyors for food, pharmaceutical or chemical use will be featured; many showing examples of system integration with Bulk material unloading devices.

“We are very excited about this expanded capability in material unloading this new equipment affords us,” states Volkman president, Nick Hayes. “We listened to our customers and worked to develop products that not only complement our industry respected vacuum conveyors, but also work to solve the powder containment issues faced by many of our customers.”
